

**Maintain summer milk
for just 13c/kgDM*.**

High yield, high energy & cows love them.

Dynamo is a low cost, high yielding crop providing excellent summer nutrition for around 13c/kg DM*.

Low cost summer feed.

Sowing a poor performing paddock into *Dynamo* turnips this spring makes sense - it can provide feed for around 13c/kg DM*.

*** Turnips for 13c/kg DM - assumptions:**

Turnip crop yields 10 t DM/ha, less opportunity cost of production from poor pasture while crop is in ground of 3.5 t DM = net gain of 6.5 t DM/ha.

Costs of growing 6.5 t DM/ha crop = \$855/ha or 13c/kg DM. (\$855 = spray out & cultivation \$320, seed & sowing \$150, fertiliser \$330, pest control \$55).

Feed value.

Dynamo has excellent feed value, with a typical ME of over 12 MJ/kg DM.

High bulb percentage.

Dynamo produces a good level of bulb (around 45% of the total yield) giving it an advantage in seasons when high levels of leaf diseases or pests are present.

Using *Dynamo*:

Oct	Nov	Dec	Jan	Feb	Mar
Sow			Graze		
Maturity date: 60 - 90 days			ME: 12 - 14 MJ/kg DM		
Typical yield: 8 - 12 t DM/ha			Sowing rate: 2 - 3 kg/ha		

High yield.

In our trials *Dynamo* is among the top varieties for yield and typically produces 8-12 t DM/ha, with top crops producing over 15 t DM/ha.

Best possible start.

Order your seed with *Agricote* seed coating to get:

Feature	<i>Agricote Brassica*</i>
Insect protection	Springtails, aphids, <i>Nysius</i> (wheat bug)
Disease protection	Damping off
Molybdenum	Plant health

* Normal sowing rates apply for *Agricote* coated seed.

For more information on *Dynamo* or *Agricote Brassica* seed coating contact your local seed merchant or your Agriseeds area manager on 0800 449 955.
