

With well-proven persistence and year-round growth, high summer and autumn production and reduced plant pulling, *Bronsyn* has set the standard by which other varieties are measured for the past 12 years.

Seasonal growth

Yield data

In NFVT® trials through the North Island, and in Canterbury, *Bronsyn* has shown excellent summer and autumn yield.

Persistence and disease resistance

Bronsyn has shown excellent persistence in trials and on farms throughout NZ. It has also shown good resistance to plant pulling on problem soils in the Waikato, BOP and coastal Taranaki (see page 46 for more details).

Sowing *Bronsyn*

Dairy		kg/ha
For high proven performance	<i>Bronsyn</i> perennial ryegrass	20-25
	<i>Kotare</i> white clover	2
	<i>Weka</i> white clover	2
	Total	24-29
Sheep, Beef, Deer		kg/ha
For proven all-round pasture	<i>Bronsyn</i> perennial ryegrass	20-25
	<i>Apex</i> white clover	2
	<i>Weka</i> white clover	2
	<i>Tuscan</i> red clover	4
	<i>Ella</i> cocksfoot	2-3
Total	30-36
