

*Ella* is a new type of cocksfoot, selected for its compatibility with ryegrass. It has good summer growth, and does not form large clumps, making it easier to manage.

**Less stem**

These photos show plots side by side under identical management.

**Seasonal growth**

**High yield**

*Ella* has high total yield, and good summer growth, when the production of cocksfoot is most important.

Seasonal yield in two 3-year Agriseeds trials (*Ella* = 100)

Variety	Autumn	Winter	Spring	Summer	Total
<i>Ella</i>	100	100	100	100	100
<i>Kara</i>	108	106	113	94	103

**Sowing *Ella***

Sheep, Beef, Dear & Dairy		kg/ha
For summer feed without clumps	Perennial ryegrass	20-25
	<i>Weka</i> white clover	2
	<i>Apex</i> white clover	2
	<i>Tuscan</i> red clover	4
	<i>Ella</i> cocksfoot	2-3
Total		30-36
