

*Tabu* is nutritious, has explosive establishment speed, exceptional winter and early spring growth and produces high year round growth. *Tabu* is unbeaten in AYT and NFVT® trials for total yield, and is the industry standard for Italian ryegrass.

### Multi-use

*Tabu* is suitable as a winter crop, a 2-3 year pasture in areas with mild summers, or for undersowing into run out pasture to boost winter-spring growth. In dense pastures spraying before drilling is recommended.

### Seasonal growth

*Tabu* establishes rapidly and provides significantly more winter and spring DM than a standard permanent pasture.

### Very high yield

No other variety has beaten *Tabu* in NZ Advanced Yield Trials (AYT) for total yield or persistence (see page 50 for more information).

### High animal performance

*Tabu* provides high levels of animal performance. In winter lamb finishing trials at AgResearch in Hawkes Bay, lambs on *Tabu* grew at 316 g/day, with a stocking rate of 48 lambs/ha. On a per hectare basis, *Tabu* averaged 15.2 kg liveweight gain/day.

### Sowing *Tabu*

<b>Dairy, Sheep, Beef, Deer</b>		<b>kg/ha</b>
Winter crop	<i>Tabu</i> Italian ryegrass	20-25
<b>Dairy, Sheep, Beef, Deer</b>		<b>kg/ha</b>
For 2-3 year pasture option	<i>Tabu</i> Italian ryegrass	20-25
	<i>Tuscan</i> red clover	4
	<i>Kotare</i> or <i>Apex</i> white clover	2
	<i>Weka</i> white clover	2
Total		28-33
<b>Dairy, Sheep, Beef, Deer</b>		<b>kg/ha</b>
For undersowing	<i>Tabu</i> Italian ryegrass	10-15
	<i>Kotare</i> or <i>Apex</i> white clover	1
	<i>Weka</i> white clover	1
	Total	12-17
